

Republic of the Philippines
HOUSE OF REPRESENTATIVES
Quezon City
TWENTIETH CONGRESS
First Regular Session

HOUSE RESOLUTION NO. 115

Introduced by **REP. BERNADETTE "DETTE" G. ESCUDERO**

RESOLUTION
URGING THE APPROPRIATE COMMITTEE TO CONDUCT AN INQUIRY, IN AID OF LEGISLATION, ON THE RESPONSIBLE AND ETHICAL USE OF ARTIFICIAL INTELLIGENCE (AI) IN THE PHILIPPINE EDUCATION SYSTEM, WITH THE END IN VIEW OF CRAFTING A NATIONAL POLICY FRAMEWORK THAT PROMOTES ACADEMIC INTEGRITY, SUPPORTS HUMAN COGNITION, AND SAFEGUARDS LEARNING IN THE AGE OF GENERATIVE AI

WHEREAS, Article 2, Section 17 of the 1987 Constitution provides that "[t]he State shall give priority to education, science and technology, arts, culture and sports to foster patriotism and nationalism, accelerate social progress, and promote total human liberation and development.";

WHEREAS, the emergence and continued evolution of Artificial Intelligence (AI), particularly generative AI technologies, such as tools such as ChatGPT, Gemini, and Copilot, are reshaping various aspects of society, including the country's education system by transforming how information is accessed, processed, and presented by students, teachers, and academic institutions. These generative Ais are increasingly accessible to students across the country and are now widely used in producing academic requirements, including essays, reports, and presentations;

WHEREAS, existing policies across schools and universities regard plagiarism as a grave academic offense, warranting penalties such as suspension or expulsion. However, there remains no legislation or policy determining whether, or under what circumstances, the use of AI-generated content may be deemed plagiarism or a form of academic misconduct;

WHEREAS, a recent study from the Massachusetts Institute of Technology's (MIT) Media Lab revealed that students who heavily relied on generative AI tools showed significantly lower brain activity and critical thinking performance, as measured through EEG scans, compared to those who wrote without digital assistance;

WHEREAS, according to the 2020 Functional Literacy, Education, and Mass Media Survey by the Philippine Statistics Authority, 8.7 million Filipinos aged 10 to 64

1 are functionally illiterate, and based on the 2022 World Bank assessment, 90.9% of
2 10-year-old children in the country could not read and understand a simple text, a
3 condition described as “learning poverty”;

4 **WHEREAS**, in a context of ongoing educational challenges, including poor
5 reading comprehension and functional illiteracy, the unregulated use of AI tools in
6 education may further compromise the development of analytical, reflective, and
7 original thinking among Filipino learners;

8 **WHEREAS**, there is an urgent necessity to establish a national framework on
9 the responsible use of Generative Artificial Intelligence (AI) in education, which shall
10 provide clear, enforceable, and future-responsive guidelines to govern AI-related
11 academic conduct which should include:

- 12 1. Definition of what constitutes academic misconduct in relation to AI use;
- 13 2. Establish a clear disclosure and citation protocols for AI-assisted
14 submissions;
- 15 3. Implement an AI literacy training for students, educators, and
16 administrators;
- 17 4. Provide safeguards to ensure AI supports rather than replaces human
18 thinking and learning;
- 19 5. Redesign assessment methods to encourage original thinking and
20 reduce AI dependency;

21 **WHEREAS**, international references such as the 2023 UNESCO Guidance on
22 Generative AI in Education and the AI-related educational policies in countries such
23 as Singapore and South Korea may serve as models in crafting a Philippine national
24 policy on the ethical integration of AI in education;

25 **WHEREAS**, In light of the rapid advancement and integration of artificial
26 intelligence in academic activities, it is incumbent upon Congress to act with urgency
27 and foresight by enacting a national policy framework on the responsible use of AI in
28 education, in order to preserve academic integrity, protect cognitive development, and
29 prevent this emerging issue from undermining the gains of ongoing educational
30 reforms in the country;

31 **NOW, THEREFORE, BE IT RESOLVED**, to direct the appropriate House
32 Committee to conduct an inquiry, in aid of legislation, on the responsible and ethical
33 use of Artificial Intelligence (AI) in the Philippine Education System, with the end in
34 view of crafting a national policy framework that promotes academic integrity,
35 supports human cognition, and safeguards learning in the age of Generative AI.

Adopted,

REP. BERNADETTE “DETTE” G. ESCUDERO
